

ON-BOARD FARE SYSTEM

Transview Non-Registering Bus Farebox

The easy to use, effective, and secure non-registering bus farebox, which accepts and displays cash fares to the driver.

The Transview nonregistering farebox offers reliable, low-cost fare collection plus a cost-effective upgrade path should the transit agency's fare processing needs evolve. Inserted coins and bills are displayed for driver inspection in escrow windows, then deposited in a secure cashbox at the push of a button. At day's end, collected cash is emptied using Genfare's industry-standard high security vault system. Modular design means the Transview can easily be converted to a CENTSaBILL registering farebox if fare registration and detailed cash collection data processing is required.

Highlights:

Transview Non-Registering Farebox

- Accepts all coins and tokens up to size of half dollar, dollar bills and tickets.
- Coin plate displays over 20 coins; bill area displays complete unfolded bill.
- Modular construction for ease of inspection and maintenance.
- Automatic coin dump when inspection plate is full.
- Illuminated coin and bill inspection areas.
- Stainless steel upper case construction.
- Lower pedestal provided with security door equipped with change lock.
- Farebox modules available to convert to full registration.

Dualport Cashbox

- All steel construction with cast aluminum easy grip handle.
- Coin compartment holds \$500 in mixed coin, bill compartment holds over 300 dollar bills.
- Provided with high-security magnetic locks.
- Designed to interface with receiver/vault and one cashbox system.
